Some one please explain why there is an issue of discontinuing or stopping XM Instant Traffic & Weather? I live in the Washington Dc Metro area. Actually I live 45 miles south of Washington DC. I travel 82 miles give or take a few miles 5 days a week and constantly have to dodge traffic jams if I can. It has been a big asset for me to listen to XM IT&W to and from work to avoid delays in going to and retruning from work. The local stations do not give timely accurate information. They do not cover the Area that I live in unless someone reports it to them. I have found XM IT&W to report very accurate information that covers the Baltimore area south through Fredericksburg VA, as far west as I-270, I-66 I-95, I-495, I-395, I-295, HWY 50 and 450 and points in between that the local stations I believe could care less because they do not have the coverage of those outlying areas. I plead my case to The FCC to let XM continue with the service they are providing and help someone. Wake up and smell your coffee. It is an asset not a liability for those of us that have the service in this area. There should be more proactive stations providing this service in a timely manner.
